

PRESS RELEASE

Dübendorf, Switzerland / Parafield SA, Australia, May 24th, 2004 – Elite’s authorized Dealer Synflight Australia Pty Ltd has installed an Elite iGATE G602 at the premises of BAE Systems Flight Training Australia in Parafield, South Australia on May 17th, 2004. The Synthetic Training Device (STD) was certified by the Civil Aviation Safety Authority (CASA) as a Category B trainer only a few days later and is already fully operational and integrated in the flight-training syllabus of BAE Systems. As well as featuring the Apollo GPS and a fully enclosed Beech B200 cockpit replica, the Elite iGATE G602 instrument panel layout replicates the Beech King Air B200 aircraft and a one-channel projected GenView Australia / New Zealand visual system.

“The emerging market in our region is China” said Keith Morgan, the General Manager at Adelaide. “The syllabus stipulated by the Chinese regulator, CAAC, calls for advanced turbo prop training, both aircraft and synthetic. For us the iGATE G602 Beech 200 device not only provides the most cost effective solution but demonstrates both innovation and quality for this level of device”.

“This is obviously a very important sale for Elite” said Elite’s sales manager, René Huddlestone. He follows up by saying “BAE Flight Training Australia is one of the most renowned flight training organizations worldwide and we are very pleased to have gained their trust in our company and our Elite Synthetic Flight Training Devices”.

BAE Systems Flight Training has a long and successful tradition in both military and airline pilot training. At Adelaide, pilots are trained for many of the world’s leading airlines such as Qantas, Cathay Pacific, China Airlines, Emirates, Dragon Air, Air China, Zhejiang Airlines and for private students from around the globe. BAE Systems are committed to the delivery and development of world-class courses for English Language Training, Selection and Flight Grading Programs, Australian Integrated Airline Pilot License Courses and Airline Transition Training.
