

MEDIA RELEASE FOR ELITE SIMULATION SOLUTIONS AG

FIRST ELITE CUSTOMER IN TURKEY SAYS SYSTEM IS PERFECT FOR FLIGHT TRAINING

The first customer in Turkey for an Elite Simulation Solutions simulator, Anatolian Stars - a FTO (Flight Training Organization) based in Istanbul - say they are very happy with a system that they describe as "perfect for instrument flight training."

The Elite Evolution S812 FNPT II is configured to represent a Piper Arrow PA-28 IV and has a single channel visual system. Certified by the Turkish CAA at the beginning of this year the S812 is in use by Anatolian Stars (full name Anadolu Yildizlari Anatolian Stars (Ayjet) to train professional pilots.

One of the Anatolian Stars team, Fikret Bayram Doganlar, said: "We, the shareholders and also the instructors of the school, are all airline captains."

"We have a lot of experience with different kinds of flight simulators, from Airbus to Boeing."

"For instrument flight training, we planned to have a FNPT II and agreed on an Elite Evolution S812."

"We are all really fascinated by the efficiency of the system. It is a perfect system for instrument flight training. Apart from that, the feel on the controls is unbelievably similar to A300 B4 flight simulators, and moreover there is no delay in their operation."

"We are very happy with our Elite FNPT II and with Elite's personnel, who are really dedicated and have a very professional aspect on all details for their customers."
