

PRESS RELEASE

French Armée de l'air selects ELITE

Dübendorf, Switzerland, 14th June 2004 – The French Armée de l'Air has selected ELITE Simulation Solutions for the supply of two **ELITE Evolution** G512 Advanced Aviation Training Devices. The Device will be used for the education and training of navigation officers on a professional and cost effective basis.

The **ELITE Evolution** G512 advanced Aviation Training Devices will be installed at the airforce base "Salon-de-Provence". Delivery and installation of the simulators is planned for July this year. The models ordered are single pilot configurations based on the Beech Bonanza A36.

The ELITE training device is the perfect environment for general basic training and even to familiarize students and professional pilots with a specific aircraft type. Features such as life-size instruments, an optional external visual system, detailed modelling of the aircraft systems and excellent ergonomics combined to create a superior interface between pilot and cockpit. The **ELITE Evolution** G512 is upgradeable to an FNPT I or FNPT II under JAR-STD 3A.

ELITE as the leading developer and manufacturer of PC-based flight simulation systems provides a wide range of simulation solutions from basic Aviation Training Devices (ATD) up to Flight and Navigation Procedure Trainer (FNPTI / II / MCC) and Flight Training Device (FTD).

Together with Flyway - the French partner of Elite Simulation Solutions AG - the company will be present at the Avia-Expo from 18th to 20th at Lyon-Bron airfield.
