

## ***PRESS RELEASE***

The UK's first Basic Instrument Training Device (BITD), an Elite Evolution S612 has been installed at Norwich International Airport.

The device installed at Flight Simulators Ltd meets the requirements of JAR-STD 4(A) and offers full cockpit replication of the Cessna 172 single engine aircraft and the Beechcraft Baron B58 twin engine aircraft.

The Elite BITD qualifies student pilots for five hours of flying towards either the Private Pilot's Licence (PPL(A)) or the Commercial Pilot's Licence (CPL).

It will be available to student pilots, existing pilots, Flight Training Organisations and groups and also, unusually, for public use, all hired by the hour.

Flight Simulators Ltd is a UK distributor for all of Elite Simulation Solutions products including Flight Training Software, Desktop Flight Consoles, Rudder Pedals and Avionics Consoles as well as offering the full range of professional training devices including the BITD. Switzerland-based Elite is one of the world's leading manufacturers of flight simulation equipment.
