

PRESS RELEASE

CAA Hungary chooses Training Device from ELITE Simulation Solutions

Budapest, May2004 - ELITE Simulation Solutions AG has installed a Basic Instrument Training Device (BITD) at the headquarters of the Hungarian CAA in Budapest. The ELITE Evolution S623 BITD is the first of its kind in Hungary and represents the latest in technology for training devices meeting the JAR-STD regulations.

The ELITE BITD was the worldwide first of its kind to receive certification last October under JAR-STD 4A. The training device is equipped with dual controls and replicates the Beech Baron B58.

Heinrich Schaible, Director of Marketing & Sales at ELITE said: "We are proud that an organization like the CAA Hungary has chosen our company as their supplier of the training device. The BITD we have delivered offers a very realistic training environment and can be upgraded to an FNPT I or an FNPT II at any time."

ELITE as the leading developer and manufacturer of PC-based flight simulation systems provides a wide range of simulation solutions from basic Aviation Training Devices (ATDs) up to Flight and Navigation Procedure Trainers (FNPTI, FNPT II, FNPT II MCC) and Flight Training Devices (FTDs).
