

## **MEDIA RELEASE FOR ELITE SIMULATION SOLUTIONS AG**

### **A brand-new ELITE Evolution S812 FNPT II is heading to TL Aviation in Westphalia, Germany**

After conducting a thorough market research and testing the flight simulators at ELITE Simulation Solutions AG HQ in Switzerland, TL Aviation company director Tobias Lehmann decided on purchasing the multi-role ELITE evolution S812 FNPT II which will help enhance its flight training status and bring the company to a higher professional level.

*“This outstanding product coupled with an unmatched and professional customer service of ELITE immediately convinced us”,* explains CEO and chief flight instructor Tobias Lehmann. *“TL Aviation in Mönchengladbach (EDLN) has been offering IFR courses since 2014. Now, this brand-new S812 FNPT II will accelerate our process of becoming a fully accredited Flight Training Organisation (FTO). This device will literally grow in parallel with our business thanks to its capability of being easily modified for our MCC training courses.”*

The factory acceptance procedure has just been completed and “testers” Mr Christian Lehmann and Mr Georg Herlemann have now returned to their home base in North Rhine Westphalia, where the shipment and installation by ELITE specialists will be expected within the next weeks.

TL Aviation has decided on an Elite Evolution S812 FNPT II based on the Piper Arrow IV with glass cockpit layout and the possibility of working with an analog instrumentation setup. It includes a 1-channel visual system and a single pilot layout with dynamic control loading (DCL) on both yoke and pedals. The addition of an original GTN650 touch screen GPS makes this ELITE simulator an even more solid and reliable unit for the continuation of the successful flight training at TL Aviation.

As outlined in ELITE’s company philosophy, TL Aviation and their highly motivated staff have been carefully accompanied through the whole purchase - from the initial contact to the installation and launch at the new site - including the necessary paperwork with officials.

Sales manager Mr René Huddleston from ELITE Simulation Solutions AG in Switzerland is proud to have added this brand-new ELITE simulator to TL Aviation and says:

*“ELITE is very pleased to be able to add TL Aviation to our customer list. TL Aviation have shown that they are a very professional company at all times, which has left a lasting impression on us. I believe that our S812 FNPT II will be a further contribution to TL Aviation’s long-lasting success.”*
