

FNPT II from ELITE installed in Bad Vöslau

Dübendorf / Bad Vöslau, 19. December 2003 - the first Elite Evolution S812 FNPT II in Austria has been installed at Watschinger Flugbetrieb GmbH in Bad Vöslau. The company has been involved in pilot training for many years and offers Private Pilot License, Instrument Rating, Commercial Pilot License and even Airline Transport License courses.

The Elite Evolution S812 FNPT II (Flight and Navigation Procedures Trainer) has been customised by the Swiss-based company to replicate a Piper Seneca III and features a three-channel external visual system. A Piper Arrow (PA 28) will be added to this FNPT in the near future. The new Synthetic Training Device (STD) meets the requirements of JAR-STD 3A and will replace the formerly used ATC 810.

Günter Watschinger, the owner of Watschinger Flugbetrieb, said: "We are convinced that this new generation training devices enhances the professional training courses we are offering. Training can be conducted very efficiently and we are also able to train our students when the weather does not permit us to fly in the real aircraft. We are sure the Elite solution will be well received by our students."

Elite Simulation Solutions AG is the leading developer and manufacturer of PC-based flight simulation systems. The company has more than 14 years of experience in developing products for instrument and flight training. With its Elite Evolution product series Elite is offering modular and cost efficient solutions meeting the requirements of JAR STD 2A, 3A and 4A.
