

Excellent Air orders iGATE G602 flight training device

Winkel, Switzerland (May 2nd, 2002) - EXCELLENT AIR, Germany has chosen the iGATE G602 King Air dual pilot flight training device featuring full size cockpit environment, as well as Instructor Station and 3-channel RealView visuals with 25 meter resolution.

This flight training device allows EXCELLENT AIR to train MCC (Multi Crew Cockpit), to do pilot assessments along with IFR currency and proficiency training. The iGATE trainer will provide the flexibility and realism required, combined with world renowned ELITE software engine to create a powerful training environment. Since iGATE trainers are based on Digital technology meaning more reliability and less maintenance than conventional simulators, this will provide EXCELLENT AIR with reliable training continuity for this aircraft platform.
