

Solinair orders FNPT II MCC

Dübendorf, Switzerland, January 2004 - Elite Simulation Solutions AG leading manufacturer of pc-based flight training devices has scored a key success by receiving its first order for an Elite Evolution S923 FNPT II MCC. The Ljubljana based Solinair Ltd. will integrate the economic system in its professional pilot training syllabus.

The Elite Evolution S923 FNPT II MCC which is currently being manufactured by the Swiss based company will replicate a KingAir B200 including all avionic systems and a GPS. The STD will also feature a 3-channel visual system and a fully integrated instructor cabin. The FNPT II MCC will be certified as *Flight and Navigation Procedures Trainer for Multi Crew Co-operation* according to JAR-STD 3A.

"After evaluating the different training systems available on the market we have decided clearly for the solution offered by Elite Simulation Solutions", said Mr. Stanislav Potocnik, CEO of Solinair. "We are not only convinced of the quality of the FNPT II MCC but also impressed by the customer orientation of Elite and the attractive price/performance ratio of the Elite solution."

Gerhard Thamm, CEO of Elite underlines: "With the sale of an ELITE Evolution S923 FNPT II MCC to Solinair we have completed our portfolio of JAR-STD 3(A) solutions and are now able to offer an even wider selection of Synthetic Training Devices. This is certainly another important step on our way to becoming the leading manufacturer of fixed base Flight Training Devices."
